Objective

An ambitious Computer Science Engineer with a passion for software development and a keen interest in emerging technologies. Seeking a challenging position in a dynamic organization where I can leverage my coding skills, problemsolving abilities, and enthusiasm for technology to contribute to innovative projects and further my professional growth.

Skills

- **Languages** :- Java
- **Web Development** :- HTML,CSS,Javascript
- **Databases** :- MySql
- **Others** :- Problem Solving and Object-Oriented Programming.

Projects

- **SignSense: Real-Time Sign Language Recognition** :
SignSense is a real-time sign language recognition project that translates gestures into text or speech using AI and computer vision. It improves communication accessibility for Deaf and hard-of-hearing individuals by bridging language barriers.
- **Full stack Inventory Management System(React,python,PostgreSQL)** :
Designed and developed a full-stack Inventory Management System with role-based access for Admin and Users. Implemented features like item tracking, stock updates, and sales management.Used React for frontend, FastAPI with PostgreSQL for backend and database integration.

Internship

- **Salesforce Administrator virtual Internship** :
Gained hands-on experience and enhanced technical skills with salesforce to contribute to real world projects.
- **Web Devolopment Intern, VaultofCodes** :
Gained first hand experience with HTML,CSS and JavaScript via practical projects which improved web development abilities and front-end technology knowledge.
- **FullStack Develoiper intern (GigaByte Labs Private Limited)**:
Developed and maintained full-stack web applications using React and FastApi.Implementing authentication,role-based access control and protected routes also working on backend API development and database management.
